REFERENCE 1535

Gympie Road Widening Work

Activities will include:

- Asphalt removal
- Excavation
- Install drainage
- Placement of pavement gravels
- Placement of street lights
- Install kerb and gutter
- Install asphalt pavements
- Line-marking
- Vacuum excavation
- Power pole removal

What to expect:

- Services location works
- Saw cutting
- Construction vehicle movements
- Compactors
- Lane closures, under traffic control
- Removal of excavated material
- Construction noise
- Some vibration
- Back-filling
- Work on elevated platforms

Work is continuing to widen Gympie Road, between Cremorne Road and Broughton Road. This will provide the necessary space for the Airport Link and Northern Busway tunnel portals and ramps. In late February, this work will move to the centre of Gympie Road.

On 23 and 24 February, night work will be undertaken between 8pm and 5am to prepare for the next phase of work.

This phase will involve the **re-opening of Leckie Road at Gympie Road**. Sadlier Street will be available under a left-in, left-out arrangement. A right-turn is available at Strathmore Street and there is a u-turn at Castle Street.

From Friday, 24 February work will be undertaken down the centre of Gympie Road between Cremorne Road and Broughton Road for approximately twelve weeks

Some night work will be required to place barriers, conduct line marking and asphalt the road surface (6.30pm - 6.30am). Further notification will be provided prior to this occurring.

If you have any questions about this work, please contact us on the 24-hour Community Hotline 1800 721 783 (freecall), or for more information about these projects please visit our website www.brisconnections.com.au.
