

ASX Release

6 July 2011

Milestones

BrisConnections Management Company Limited (**BCMCL**) as responsible entity of BrisConnections Investment Trust and BrisConnections Holding Trust (collectively, the BrisConnections Unit Trusts - ASX Code: BCS) today announced important milestones for Airport Link project, the largest privately funded transport infrastructure project in Australia.

End of tunnelling

Rocksy and Sandy, the two Tunnel Boring Machines (TBMs) working on the Airport Link project, have broken through finishing their journeys at Lutwyche less than a year after their launch from Kalinga Park.

The two TBMs tunnelled over 2.5 kilometres and progressed along the alignment at rates of up to 110 metres a week.

The breakthroughs represent the end of tunnel excavation on the Project other than on some ramps and cross passages.

The tunnels are now in the process of being fitted out with mechanical and electrical equipment in readiness for commencement of operations in mid 2012.

Jacked box completion

The two giant concrete boxes, 12.5 metres high, 65 metres long and with a combined span of approximately 38 metres, have completed their push of approximately 55 metres to position them beneath the North Coast Railway to form part of the Airport Link tunnel. This operation was one of the most complex engineering aspects of the project's construction and was the largest operation of its type in Australia.

BrisConnections Chairman Trevor Rowe AO said it is now possible to drive underground from Toombul to Bowen Hills and it is only a short time to mid 2012, when Brisbane drivers will be able to also experience driving on Airportlink, saving up to 50% in travel time.

"With over 80% of the project now complete, Brisbane drivers can now know the end is in sight not only on and under the ground but also uniquely via our "drive it before it's real" tool on our website at airportlinkM7.com.au. Significant work is still to be completed but we are well on the way to opening to traffic this critical piece of infrastructure in South East Queensland in mid-2012," Mr Rowe said.

### About BrisConnections

BrisConnections has been awarded a 45 year concession to design, construct, operate, maintain and finance the Airport Link tollroad in Brisbane. Airport Link is a 6.7 kilometre multi-lane electronic free-flow tollroad with dual 5.7 kilometre tunnels. Upon completion, Airport Link will operate as a multi-destinational road connecting Brisbane's northern suburbs with Brisbane's CBD and Brisbane Airport, the CLEM7 Tunnel and the Inner City Bypass. It will also serve as a key distribution road, connecting some of Brisbane's major destinations such as Brisbane Airport, the CBD, Royal Brisbane Hospital, Australia TradeCoast and Chermide Shopping Centre.

## ASX Release

---

Airport Link is being constructed using a world class, innovative design solution, with connections avoiding intersection delays and streamlining traffic flows. Lane configuration will provide for separate traffic movements, with early decision points, to minimise traffic weaving and merging.

Airport Link is being built around an electronic free-flow tolling design. Electronic free-flow tolling is mandatory across all Queensland tollroads and Airport Link tags will be fully interoperable with other Queensland and Australian tollroads.

BrisConnections is also designing and constructing a portion of the Northern Busway between Windsor and Kedron and an upgrade of the East-West Arterial / Airport Drive / Gateway Motorway interchange at Brisbane Airport, both of which are funded by the Queensland Government. BrisConnections will not receive any revenue from these projects and they will both be handed over to the Queensland Government upon commissioning.

An investment in BrisConnections Unit Trusts comprises a stapled security made up of one unit in BrisConnections Investment Trust and one unit in BrisConnections Holding Trust. Stapled securities in BrisConnections are listed on the Australian Stock Exchange under the code "BCS". There are many factors that may affect the results of an investment in BCS which are outside the control of the Directors of the Responsible Entity or may not be capable of being foreseen or accurately predicted.
