## BOWEN HILLS

DATE 27 January 2011 REFERENCE 1481r1

### **Update:** Cartwright Street – Air Quality Monitoring Station

Under conditions established by the State Government, BrisConnections will be required to monitor and report on air quality during operation of the Airport Link tunnel. Ongoing monitoring of air quality must be conducted at two monitoring stations for each ventilation outlet across the Airport Link project alignment.

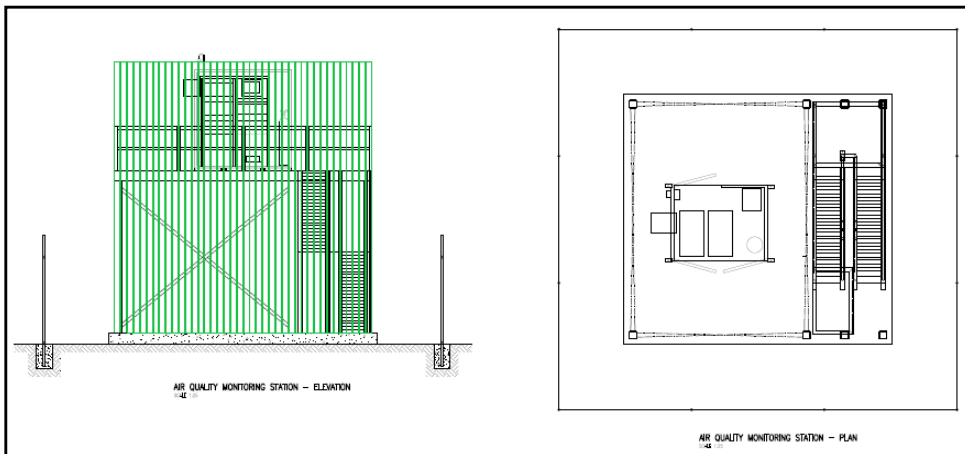

Following community consultation, a site between Cartwright and Bryden Street, Windsor (indicated in the map overleaf) has now been selected to install one of the air-quality monitoring stations (AQMS) to monitor emissions from the Bowen Hills ventilation station outlet.

The AQMS will be installed on a concrete hardstand approximately 10m x 10m and sit on an elevated platform above the one in one hundred year flood level.

The monitor will be set back from the street into the parkland and metal side screens painted eucalyptus green installed around the outside to minimise the visual impact on residential properties. During its operation, the AQMS will produce only low level noise similar to that of a household air-conditioner.

#### What to expect:

- Commencing 31 January, the AQMS will take approximately 8 weeks to construct, including site establishment
- Removal of some trees to allow required clearance to the sky for the monitor
- Technicians accessing the AQMS on a weekly basis for maintenance during its operation

*Elevation and plan view of the AQMS*

*Toombul AQMS*

#### Want More Information?

If you have any questions or concerns about the AQMS, please contact the Bowen Hills Community Relations Team on 1800 721 783.
