

ASX Release

13 January 2011

Airport Link Project and Brisbane Floods.

BrisConnections Management Company Limited (**BCMCL**) as responsible entity of BrisConnections Investment Trust and BrisConnections Holding Trust (collectively, the BrisConnections Unit Trusts - ASX Code: BCS) advises the following in respect of works undertaken by its contractor Thiess John Holland ("TJH") on the Airport Link project.

TJH are closely monitoring all Airport Link worksites in relation to the flood situation in Brisbane to ensure all appropriate management and mitigation measures are in place.

There are no immediate concerns with worksites in Kedron and Toombul which are adjacent to Kedron Brook/Schulz Canal, as this stormwater channel is not affected by the flood levels in the Brisbane River.

The potential for the Bowen Hills worksite, adjacent to Breakfast Creek, to be affected by the rising tide levels appears to have passed.

This site is protected by a perimeter flood bund designed in accordance with standards to protect against major floods. In addition as added precautions, TJH undertook further levee construction works within the site to mitigate against possible extreme flood impacts and prevent flood water entering the tunnels. The perimeter bund has protected the site from the peak overnight.

In addition, as added protection measures, tunnelling activities ceased in this area and primary equipment and materials were removed from the tunnels to higher ground. The site office personnel and equipment were also evacuated from the Bowen Hills site.

BrisConnections and TJH continue to closely monitor and assess the situation, with the safety of workers a top priority.

### **About BrisConnections**

BrisConnections has been awarded a 45 year concession to design, construct, operate, maintain and finance the Airport Link tollroad in Brisbane. Airport Link is a 6.7 kilometre multi-lane electronic free-flow tollroad with dual 5.7 kilometre tunnels. Upon completion, Airport Link will operate as a multi-destinational road connecting Brisbane's northern suburbs with Brisbane's CBD and Brisbane Airport, the CLEM7 Tunnel and the Inner City Bypass. It will also serve as a key distribution road, connecting some of Brisbane's major destinations such as Brisbane Airport, the CBD, Royal Brisbane Hospital, Australia TradeCoast and Chermside Shopping Centre.

Airport Link is being constructed using a world class, innovative design solution, with connections avoiding intersection delays and streamlining traffic flows. Lane configuration will provide for separate traffic movements, with early decision points, to minimise traffic weaving and merging.

## ASX Release

---

Airport Link is being built around an electronic free-flow tolling design. Electronic free-flow tolling is mandatory across all Queensland tollroads and Airport Link tags will be fully interoperable with other Queensland and Australian tollroads.

BrisConnections is also designing and constructing a portion of the Northern Busway between Windsor and Kedron and an upgrade of the East-West Arterial / Airport Drive / Gateway Motorway interchange at Brisbane Airport, both of which are funded by the Queensland Government. BrisConnections will not receive any revenue from these projects and they will both be handed over to the Queensland Government upon commissioning.

An investment in BrisConnections Unit Trusts comprises a stapled security made up of one unit in BrisConnections Investment Trust and one unit in BrisConnections Holding Trust. Stapled securities in BrisConnections are listed on the Australian Stock Exchange under the code "BCS". There are many factors that may affect the results of an investment in BCS which are outside the control of the Directors of the Responsible Entity or may not be capable of being foreseen or accurately predicted.
